Frontend Developer & UI Engineer

Modern Frontend Development

Clean Code. Modern UI. Best Results.

I build fast, responsive websites and scalable web applications using modern frontend technologies.

About Me

Hi, I'm **Michael**, a frontend developer behind MC Codes.

I specialize in building modern, responsive web applications using **Angular**, **TypeScript**, and **Tailwind CSS**.

My focus is clean architecture, scalable frontend systems, and user experiences that perform across all devices.

I help startups, agencies, and businesses turn designs into fast, reliable, and maintainable web applications.

My goal is simple: clean code, great UI, and reliable performance.

Services
